

BLUEINK THE #1 DOCUSIGN ALTERNATIVE

eSignature for Healthcare
Providers, powered by
Amazon Web Services

WHY BLUEINK FOR HEALTHCARE SERVICES?

Blueink, the #1 DocuSign alternative, is powered by Amazon Web Services (AWS) and is an AWS consulting partner with a long history of reference-able and successful healthcare engagements. Blueink provides best in class, customer-centric eSignature products and support that are top-rated, with a hyperfocus on affordability and ease of use. Blueink's HIPAA compliant eSignature solutions for healthcare can increase patient satisfaction and decrease your patient processing and intake time improving the patient and staff experiences.

MAKING PROCESSING FASTER & EASIER

Compliance

Blueink fully complies with HIPPA and GDPR requirements.

Trusted

Trusted by thousands of customers and companies all over the world.

Reduce Cost & Time

With Blueink the patient admission and registration process can be quick and convenient. You can have your patients process and sign forms online, on their mobile device or send them documents ahead of time for pre-registration.

Increased Productivity

Going digital not only allows you to maximize your staff's efficiency it also reduces wait times, eliminates lost files, and improves your patient's overall experience. Blueink allows you to intake patient info and get claims processed electronically in half the time while maintaining HIPAA compliance.

Enhanced Workflow

Streamline patient intake, consent forms, and more by connecting Blueink to your current patient platform.

API Integration

See how Blueink can integrate with your system to improve your process.

Powered by AWS

As the most secure, reliable, and broadly adopted cloud platform, AWS is the trusted technology partner for healthcare providers and protected health information worldwide. Providers can accelerate innovation, unlock siloed data, and develop personalized care strategies—all while operating securely in a highly regulated industry.

Blueink is a people-first eSignature company that prioritizes its healthcare customers. We add value to their healthcare systems by providing substantial time savings, and best-in-class customer support at a price that is hard to beat.

BLUEINK'S KEY FEATURES

eSignature API - Robust, cost-effective, and easy-to-integrate eSignature API allows you to complete signature transactions with ease. Our dedicated API success team is always available to help create a seamless integration to your current patient platform and provide you with the comprehensive support you deserve whenever you need it.

Single Sign On - Manage one authoritative identity per employee and extend that identity to virtually all resources. This improves the login experience for end users and gives healthcare providers and administrators the ability to quickly revoke access across your environment when necessary.

Real-time Dashboard - With Blueink, healthcare providers and administrators can track everything straight from our industry-leading dashboard. Make processing faster and easier with real-time tracking, progress updates & reminders and seamless integration.

White Label & Custom Branding - Make it look like you made it – Integrate Blueink API with your branding to create a flawless, fully customized experience for your signers.

Certificate of Evidence - The Certificate of Evidence is a stand-alone, cryptographically secured document containing a detailed audit trail of signing events – from document creation to completion.

Signer Attachments - Collect additional documents from your signers. Signers can upload documents however they sign – on desktop, tablet or smartphone.

SMS Delivery - Need a document signed fast? With our revolutionary platform, you can deliver your document and have it signed in minutes with our ultra-secure, state-of-the-art eSignature SMS delivery.

Bulk Send - Send a set of documents instantly to dozens, hundreds, or even thousands of signers at once with no limitations.

Strong Signer Authentication - Strong identity verification on any device. Blueink can capture a selfie, a driver's license picture, SMS pin, and more. Know who your signers are with virtually irrefutable proof of identity.

Embedding Requesting & Signing - With Embedded Signing, your signers can review and sign documents without leaving your app or website and without downloading software or apps.

Smart Link Forms - Embed clickable and fillable forms on your website for easy access and completion by signers. Patient admission and registration are made easy. Have your patients sign and fill out required forms online or on any mobile device.

Automatic Reminders - Make sure your patients are aware of documents you need. Setup and send automatic reminders. Avoid costly delays and save time on missed appointments.
